

**NEEDS SURVEY ON JAPANESE LANGUAGE EDUCATION IN KENYA
(2023)**

**REMARKS FROM LEARNERS TO STAKEHOLDERS OF JAPANESE
LANGUAGE EDUCATION IN KENYA**

1. My experience of learning Japanese has been very interesting and fun .
2. The language is advantageous because it helps students identify different potentials in them, like teaching
3. I am enjoying my japanese learning journey so far.
4. Japanese is a fun language to learn which requires one to be committed.
5. It takes time to learn writing in japanese .They should avoid any rush as it has three types .
6. Japanese is interesting and should be taught more intensively
7. Better learning materials should be provided, minna no nihongo is not intuitive
8. Due to elements of Japanese culture, like music, manga and anime; there is a great interest in learning Japanese among the youth. Teaching methods employed to teach interested individuals should ease the students into the language otherwise the difficulty of the language may chase most of them away.
9. Japanese is an amazing language and comes along with amazing culture.
10. Japanese is very easy to understand and learn.
11. It would be very exciting if trips to Japan were organised for students, so that they can see firsthand the country they are studying the language of, and learning about.
12. Provided you have a good tutor, learning Japanese is very fun and exciting. Learning about the way of life and culture of the Japanese people while learning the language makes learning much interesting. In order to get better of it, you MUST be deeply involved in practicing.
13. Give us more resources on studying Japanese. Subsidize the fees for the JLPT
14. It is a beautiful language
15. More needs to be done so that we are much exposed not just in our tertiary level but should be introduced to us at an earlier stage
16. It will be good to incorporate japanese into the curriculum at an earlier stage, say primary school and make it examinable to incentivise the taking up of the same.
17. I love Japanese language and their culture and am looking forward to knowing more about the language
18. I would recommend more listening and speaking practice introduced by the instructors.
19. My experience has been productive, I have managed to learn a lot. However, I would like the incorporation of more listening skills with native Japanese speakers such as recordings to help during JLPT revision.
20. Japanese would be more enjoyable if it is learnt practically where I am able to use it in the day to day interactions not by just sitting behind a desk or screen. So maybe going to a restaurant and ordering in Japanese would be more fun and effective compared to learning virtually in class.

21. My experience so far has been wonderful!
22. Japanese is a beautiful language.
23. It's easy and I can't wait to converse in Japanese
24. Japanese is an interesting language to learn as it does not follow the same rules as English. This makes it a bit challenging to learn but I love their culture and their ways so it motivates me to learn more
25. Japanese language materials should be made available easily everywhere. Make learning more fun and simple.
26. Great work!
27. Japanese is a very fun language to study and far much easier than french as I took it in high school...I feel like it should be introduced in high schools as an option
28. Although I did not continue learning Japanese after 6 months, it was still a very fun experience. I hope to continue learning in the future and visit Japan.
29. There is need to provide more interactive sessions for students of Japanese language eg Japanese music lessons, tea ceremony etc
30. 私のもくてきは日本のせもんがこうに行きたいんです。今はちょっとむずかしいでもがんばります。
31. It requires a lot of time and patience to do learn the language
32. Japanese is a language that i personally find quite easy to understand and follow and i think its something I want to be fluent in
33. It's not as easy as anime portrays it to be
34. にほんごわかわいいです。
35. "Choosing to do Japanese has been the best decision i have made this year. It is very interesting and through it i have learned a lot about Japan and it's people"
36. So far I love Japanese language and I'd really love the Japanese universities to do more exchange programs to Kenyan students also provide scholarship programs and should not emphasize on one must know the language since some students aren't very good in languages
37. I love the language and the culture that's why I am learning Japanese. It is currently difficult for me during the classes but it is jsut the need of discipline and practice which will help me further. Although the nouns, verbs and adjective could be given in both Japanese, romaji and English to helo memorise them.
38. I would like a more digestable way to undestand and retain information about Japanese culture and the language
39. It was such a wonderful experience to learn this thrilling new language
40. Japanese is an interesting language to learn.
41. japanese is an interesting language needs a bit of effort but easy to learn
42. I think it is a beautiful language, it's exciting to learn it but I find that it's probably exposed to some of us at the wrong time I guess. But I love everything about Japan and really appreciate the work being done by stakeholders to foster and share the culture globally.
43. They need to take into consideration that for non native speakers it is hard and

- they need to find teaching methods that will accommodate that for example more English translations and writing on the white board for better understanding
44. It has been very positive so far, I can't wait to learn more!
 45. Japanese should be added in highschool curriculum it will enable those who have the interest of learning Japanese to be able to learn from a tender age cause we all know its not easy to teach an old dog new trick
 46. One of the best languages
 47. I am still discovering more about this language but so far so good and I love the way my sensei teaches me. It is always good to have fun while learning a language like Japanese.
 48. Make Japanese more mainstream
 49. a more immersive class is better to speed up the language learning process
 50. I would like to study it and be proficient in it. Sometimes i do feel overwhelmed that i am still lacking.
 51. ORGANISE trips to go to Japan
 52. My experience of learning Japanese has been and is still an insightful journey. I get to learn new things everyday which makes me be more appreciative for the language and the culture in its self.
 53. Keep up the good work (?)
 54. Learning Japanese has given me a purpose in life and i hope to get better at it.
 55. With the rise of interest in Asian culture, particularly Japanese culture as a result of popularity of anime, it could be beneficial to offer Japanese lessons to people who have a particular interest in it. It would also be wonderful to get personal accounts from people of color about their experiences in Japan do as to demistify the rumors about foreigners' experiences in the country.
 56. It's a fun language, but I would be great if slowed recordings of sentences ,and words with difficult pronunciations could also be made available.
 57. I thank you for your efforts of making sure that those interested in learning the language and the culture can be able to do so through your hard work.
 58. Hajime no ippo is peak
 59. Try teaching it from lower levels of learning like primary school so that students are much more familiar with the language at campus level making it easier to learn advanced communication skills
 60. Japanese is good language it should be made more popular like other foreign languages such as French.
 61. Japanese is not really hard , easy to speak and enjoyable language
 62. Japanese is a really interesting and fun language to study and I hope to learn more of it even if its individually using duolingo . Hopefully i would one day work in Japan to experience more about there culture.
 63. I love it.
 64. I have a passion to study the language with the aim of teaching it in private primary schools in my locality. How may i secure a scholarship to study Japanese?
 65. This language should be spread even to highschools and be like french and germany. I feel it's even more worthy to study Japanese for brain sharpening.

66. Learning Japanese is a bit difficult but I find it interesting and fun to speak the language. I'm looking forward to knowing Japanese in broad range.
67. I would say that Japanese is a very intriguing subject. I got exposed to it though Japanese media like anime and music and wanted to know more about it. While it gets a bit challenging to balance between Katakana, Hiragana and Romaji with a bit of Kanji, I find it somehow easier to learn since it has similar rules and aspects with Swahili which is my country's language. I intend to learn Japanese out of interest and partially for my career in education.
68. Japanese is a nice , interesting and a very interactive language. I would recommend it to be taught in all institutions. Maybe you would provide exchange programs between us and students in Japan. Thanks
69. The JLPT being a speed test especially at the first level and with less time in some way does not motivate someone..
70. I am glad to be part of the group that is able to study Japanese as a foreign language.It is quite interesting .
71. Japanese is an interesting language
72. I think that Japanese language is interesting especially because almost every word has some cultural background to it. The characters are not the easiest but are very learnable from the experience I've had. I would like to ask stakeholders to provide information about available online Japanese tutors incase there are. There was one that I was informed about previously but my schedule could not fit so I would like to know if there's one in future again.
73. Japanese is nice language and probably interesting with opportunities.
74. You could lower the JLPT fee, publicize the japanese culture and language to attract more people
75. It is a golden opportunity to have Japanese language study at the University for students.It facilitates connection and cultural inclusivity in our institution.
76. While some teachers can make Japanese interesting as they teach using only a textbook, it would probably be more enjoyable if they incorporated an online quiz into their lessons(like Kahoot quizzes).
77. I feel like people don't know that Japanese language is offered at most of those institutions listed, I believe that the Japanese language education stakeholders need to do a Bette job at marketing the Japanese language to the general public specifically the youth who have an abundance of free time.
78. ありがとうございます
79. I like studying japanese
80. Japanese language is good
81. The only way to learn a language properly is by practice and Interaction with the language. This includes conversations, listening to audios, songs, and podcasts, watching the movies etc.
82. Learning Japanese for me has been solace ,I run to it when am under pressure or stress and I find joy in learning and exploring all that there is to it .
83. I enjoy studying Japanese. In as much as I do it for the love of Japanese culture

and entertainment, I might also consider a scholarship to study my masters in Japan. As an engineering student, the main obstacle is time and balance between Japanese and my career. I hope for the tutors to be patient as I also try my best to manage both at the same time. Otherwise, the tutors are really doing good work at a personal level.

84. I have actually really enjoyed studying Japanese and learning about the culture. I would also like to visit Japan and experience some of these cultures. The language has been good and it has been interesting learning a new language. Nonetheless, I need to do a bit more studying by myself because I am still a bit slow in the reading and writing but I am slowly but surely learning. Thank you for the initiative to have the teachers teach us here at school. I probably wouldn't have gotten this chance elsewhere. It is an amazing initiative.
85. A comprehensive beginner's dictionary/encyclopedia/thesaurus centred around romaji only.
86. I am grateful for the opportunity being given to people who have even the slightest interest in learning the language. Thank you.
87. Japanese is a really enjoyable language. I would say it's poetic. I left it to go take Chinese but every time when a friend of mine who was taking Japanese language would speak. I would desire the language once over. All the best.
88. The most interesting language to learn
89. Japanese language is an interesting language . More time should be dedicated to the teaching and learning of the language
90. It's interesting and I would like to pursue Japanese to the fullest
91. I love it because Sensei said we can get away with slightly wrong pronunciation. Some people say it sounds like Swahili. I am really grateful I don't pay to take it. Thank you to Kenyatta University and everyone concerned.
92. My experience in learning Japanese has been very great. It has enabled growth mindset and grit.
93. Get to show an easier way of getting to learn hiragana
94. the language is really enjoyable
95. It's a great experience for me and I enjoy learning the Japanese language.
96. Japanese is easy and enjoyable language .I appreciate you for introducing Japanese here in my university . Thank you much .
97. I appreciate them for introducing Japanese language to my institution for us students to learn and understand the language..It's a very enjoyable language.
98. I think there's a really large growing interest about Japanese and the overall culture among students and more education or services need to be easily offered and accessible to cultivate that interest and learning experience early on
99. I love the way our teachers are teaching us by motivating us and teaching us in a language that we can understand
100. I love the language and have desires to work with the Japanese citizens.
101. I am excited to learn Japanese as a foreign language. This is because I will be able to visit Japanese or even study there. I am excited to learn its culture as well

102. Thank you for providing the opportunity to learn Nihongo
103. I would like you to organize maybe cultural events en help us get a chance to participate because I find them interesting
104. Japanese language should be introduced to the Kenyan curriculum so that it may be well be familiar especially with the young population
105. It's an interesting language that I look forward to being great at
106. Learning Japanese is fun that's if you have interest in it.....I like japanese and I'm looking forward to working in Japan
107. It was a great idea to bring and teach the students/public about the Japanese Language , opportunities were made and dreams have/will be achieved
108. "I have learnt quite a lot already though I started attending classes recently and I believe this language will enable me explore the world. "
109. The language is difficult at first but as one interacts with more Japanese language users it becomes interesting. This may complement the learning process
110. Thank you for your efforts, however, please advertise your services national wide, not so many people know about your existence. Thank you.
111. Japenese is a very interesting language with the right attitude
112. Kudos to introducing the language to kenya and should be proposed to even primary schools but optional just like French or German. Its good for the future is unknown
113. "Japanese language is very wide and can be very confusing sometimes. It requires a lot of practise. The japanese teaching teachers are very patient and passionate about it. Keep up the spirit and good work"
114. Japanese language carries a lot of culture and valuable life lessons. It is more enjoyable when you get to talk with the Japanese peaople.
115. Japanese is a wonderful language to learn, its script is quite beautiful (the reason why I got into it) and the culture behind it is fascinating. I feel like there's a greater demographic that can be accessed, you just need the right marketing. Also, I've found the immersion technique of language learning to be more effective in achieving fluency. If you can combine that with your current teaching methods, it'll help.
116. I have learnt a little and willing to learn more.....I love every bit of Japanese culture and way of thinking
117. Japanese is hard but very enjoyable and has employability.i really hope it will take me far
118. Japanese is an interesting language to learn about.
119. "Thank you for offering the learning institutions , materials and teachers even from Japan. This has helped us to learn more about the environment that we are growing on and the technology that is being developed. We get to communicate with different people from Kenya and also from Japan and this has created bond between the two countries. I would love to learn more and have an experience and interaction there in Japan. Also I would love to do tours with a Japanese company."
120. Learning Japanese has been very interesting and it's more easy to

- understand when taught physically
121. To embrace using the audio gadgets so that we know the correct pronunciation and real Japanese accent early enough.
 122. Japanese is a beautiful language and has a good culture from what I've learnt from school and the people with an interaction with the Japanese people. I think interested people should be encouraged to learn it.
 123. I love the Japanese language and pray that I may get a scholarship to do my masters in Fashion in Japan, in the coming year. I do wish that information about Japan scholarships were regularly broadcasted and easy to access. I am so grateful to the Japanese language education stakeholders and Japanese embassy for letting us embrace such a beautiful culture and language. ほんとう!ありがとうございます!
 124. Thank you for making Nihongo available in Kenya
 125. Japanese is a wonderful language
 126. Japanese language is more interesting and I love it.
 127. The mode of delivery of the Japanese study is quite advantageous when face to face mode is used. Enable the gadgets in the institutions to be functional mostly for audio listening for it will help a lot as far as listening the fluency is concerned.
 128. Learning Japanese has become one of my hobbies, with the help of my teacher and the Duolingo app, it's been a walk in the park. I would humbly recommend the stakeholders to create an awareness of the language and offer scholarship or discount to the students who can't afford JPLT.
 129. I have already studied German as a foreign language but I would say German is the hardest alphabetical language. Comparing it to Japanese, Japanese seems a little bit easier to speak but a little bit harder to write. I love Japanese because I want one day to work in Japan and learn their culture too. Or maybe teach it as a language teacher. I believe Japanese is important because most of the young people here like Animes a lot and it would be better for them to know the language so that they even understand what they are watching. I knew Japanese from my small brother who loves watching anime like Demon Slayer and once I found it in my university I couldn't help but do it. Japanese language is interesting too.
 130. Studying Japanese has been the best experience of my youthful years, and having the opportunity to even take it a step further at my University has helped me remain sharp and motivated throughout my campus years. While it may not be the easiest language to learn, I feel that it is one of the most interesting languages to learn, especially because of the culture of the Japanese people. I owe a debt of gratitude to all of my Sensei and to all the stakeholders who help enthusiasts like me learn Japanese.
 131. Learning Japanese is easy but speaking is another problem
 132. Japanese language is the best 🍡
 133. Let's have many classes and interactions between the teachers and the students. Thanks

134. "Konnichiwa. Watashi wa C desu. My Japanese class happens on Tuesdays and I do look forward to it a lot. I'm currently learning about the form of verbs and it's been quite challenging but interesting. I, being an prospective engineer, aspire to do my masters in Japan and possibly work there for a time. I am also practising some Kanji by myself in preparation for the JLPT. I'm grateful for the effort by Japanese education language stakeholders, initiatives such as this are very appreciated. I do believe participating in the Japanese language and culture can open up opportunities that I may not have even thought about yet, and I'm here for it."
135. Thanks for making Japanese free for those who are students in the institution offering them
136. It's amazing I keep learning more about Japanese culture
137. We need more motivation
138. The language is awesome and if possible each institution should be given a chance to study it.
139. It's a privilege learning Japanese language and culture and I'm looking forward to having more interactions with the stakeholders.
140. So far I am enjoying my Japanese learning journey and I will keep on learning.
141. To take the language seriously since it's so interesting
142. Let the course be offered at specific time in respect to one core courses. Mostly we find the timetables clashing hence unable to attend the Japanese classes. They can also provide make up lessons on Saturday for those who miss the classes.
143. Japanese language is an interesting language to learn and if one gets the chances to learn it they should use the opportunity wisely
144. Please provide more learning facilities for the learning of the Japanese language to be smooth
145. Japanese is a good language, I would like more support so that I go and teach English and literature in Japan, and that was my goal as I was enrolling to it.
146. The stakeholders are doing well and we need to motivate more people to learn Japanese as well
147. Japanese language is fun to learn and easy
148. For the stakeholders to visit the schools mentioned so as to oversee how the learners are learning the language in a way that motivates the students. It is fair that they increase more chances to study in Japan under scholarships. Thank you.
149. If they can connect Electrical and Electronics Engineering students for Masters opportunity in Japan.
150. Give more job opportunities to people who have dedicated their efforts in studying for this great language.
151. It is fun and interesting
152. "There is need for improvement on the facilities needed to study Japanese language in most institution. Such facilities include; Japanese Text books, Video

and audio lessons. The Japanese language facilitators and teachers should provide public awareness on the benefits of studying Japanese Language"

153. "日本語の勉強はながいいみちのりです。がんばります。日本に行くつもりです。"
154. Learning Japanese has been one of the most eye opening and enjoyable experiences I've had. Just a thought, a virtual library where access to Japanese learning resources are organized would be a great addition if it does not already exist. Contacts to learning programs and teachers could also be found.
155. "Nihongo is easier if we can get natives japanese teacher to teach us... However, not everyone can able to pay for classes and exam ,so make it free"
156. I would like to be a nihon-go sensei
157. It's an interesting experience and an interactive one that helps one think out of the box as they are put up to the challenge
158. Learning Japanese is interesting
159. I appreciate them for providing awesome opportunities to learn Japanese across the country.
160. Learning Japanese is very interesting
161. I am enjoying my time learning Japanese and hope to go to Japan in the future. I Hope that the Japanese language stakeholders in Kenya provide more opportunities for Kenyan students learning Japanese to go to Japan.
162. Kindly provide opportunities for culture exchange or summer school students between japanese students from Japan and Kenyatta University Japanese club members
163. As a beginner can recommend the language to any person willing to learn a foreign language but don't know which to go for
164. "It's a good subject to learn but it requires more equipment of teaching for easier understanding"
165. To give more resources for study both softcopy and hardcopy
166. Thanks to all Sensei devoting their time to teach us Japanese
167. It a blast learning the language.
168. Japanese is a very easy language thus making it fun to study it.
169. Japanese is a broad language with broad experiences and it is fun to study. I hope to become fluent in it and expound on my knowledge.
170. My experience with the Japanese language is simply breathtaking. I find the language quite interesting and delightful, with much experience I intend to watch anime with no sub or dub. How the Japanese people talk; their accent, their tone and their manner of behavior gives me the inspiration to continue learning Japanese. Our lessons being face to face have given me a clear understanding of the language, and my favorite part is writing hiragana its interesting.to Japanese language stakeholders in Kenya ,kindly expand the language to reach more Kenyans they would love it, I know I did.
171. Nihongo lauguage is a beautiful lauguage and is fun to learn ,speak and write.

172. Japanese language is interesting and I've been learning a lot. Thank you for bringing it to Kenya
173. We appreciate the effort you put on us student. Thankyou
174. Japanese is a fun language if taught appropriatelyhowever one should think about involving their early students in other activities critically as they may not be prepared or have not trained enough to participate in events and exams
175. The language is enjoyable and the services of the instructors are good.
176. All I have to say is that over the years the interest in the language has grown. Just because you don't hear about it much doesn't mean there aren't people who would want to learn Japanese. All people need is a slight push and a little encouragement which is where you guys come in.
177. Japanese is an interesting subject!
178. My experience learning Japanese has up and down..but I would appreciate it if there was an environment for rookie speakers to interact and grow their skill in the language in kenya, since it's easy to forget due various challenges...
179. To provide an online platform for japanese language and if its their to advertise it
180. Interested in learning Japanese language
181. I would very much like to learn Japanese,I am a big language enthusiast, and given the opportunity and time, Japanese will be the language I'll be going for in the near future
182. I think they should invest first in opening up opportunities for learning through free scholarships for at least one level like the French embassy. There's limited information concerning Japanese language centers and other facilities
183. I would like to study japanese language in Japan universities since my dream is to work in Japan
184. I feel that the exposure of Japanese is not as widespread as other languages such as Chinese, French and german. personally, I was demotivated to study Japanese because Japan is mainly a technological and automative country, leaving little to no space for an individual like myself whose interests are in cross culturalism, tourism and travelling, assuming that i am learning Japanese with the aspiration of gaining a scholarship to study in Japan
185. To Kenyan government, it should allow the study of Japanese in high school. It'll be great for students.
186. Learning Japanese can be challenging, but it's a rewarding experience. To Japanese language education stakeholders in Kenya, I'd like to emphasize the importance of promoting not only language proficiency but also cultural understanding. Encourage immersive experiences, celebrate cultural exchanges, and make resources accessible. By fostering an environment that embraces both language and culture, you can inspire a deeper appreciation for Japan and its language, creating a more vibrant and diverse global community.
187. "I would really love to study Japanese online and get certified to favor my work as well. I love Japanese language and so if an opportunity avails I will be

- glad to take it. Arigatoo gozaimasu"
188. Please support us who have no access to institutions and capacity to learn Japanese have the access. Thank you
189. "I will appreciate if the study investigator can organize for a webinar session in future and share her findings with the survey participants. Finally, I will appreciate if you can organize for us an information session on the Japanese Language Proficiency Test (JLPT). Thank you."
190. No yet started learning Japanese
191. Learning is continuous process and Japanese Language is one of the languages to help improve your network and appreciate other cultures. The Japanese work culture and environmental awareness is one aspect I would encourage Kenyans to adopt for development.
192. The stakeholders should make available sources and information of how to learn Japanese language in Kenya
193. I think the Japanese language is very interesting. I just wish i had heard about it sooner in my University since i would have been able to complete all the modules before i became too busy.
194. Please be more proactive in sharing insights to learning Japanese.
195. I appreciate the effort that is being and how they keep motivating us through events such as study in Japan fair. We do not take it for granted. Arigato gozaimasu
196. I would like to redo my japanese proficiency test and be certified tutor too
197. "Japanese Language teachers charge very highly and based on a Per session charge rather than a package charge. This influences the learning process this less motivated and too expensive to engage. Having relied on self study, I turn listening easier and able to actually make out words and phrases. However, it's harder in understanding the characters involved to write and read. I would very much like to learn Japanese and I think that the JLaTaK should ve more accessible as unless one attends a school they teach or Japanese embassy events one cannot find them."
198. "I would like to learn the Japanese language and be proficient. I would also like to study in Japan in an exchange program or masters scholarship.
199. I would wish learning and teaching of Japanese in Kenya to be boosted through reduction and subsidizing certification costs and lessons
200. In my opinion japanese is a unique and intriguing culture and language that could foster a good human resource in our country.
201. Japanese language in Kenya should be taught in any University or higher education learning institutions to strengthen the ability for those who desire to study and work in japan like me. I started flowing japan 20 years ago, from movies to culture and speaking the language itself I fell am one of them, but in my colleges I looked where i can join and register but no one, till I join the Africa study fare organized by the japan embassy in Kenya. and now i feel i should take this language to level 1 or n1. and soon am determined to get it. though I am applying for integrated science program in japan, Hokkaido university and I pray to God to

- se me through. From my Childhood I wished to study in japan, though late but its not lost.
202. There should be more institutions especially universities where one can easily study Japanese Language
 203. Create exchange opportunities for undergraduate students in Kenyatta University Japanese club coz that will improve our communication skills and also mastery of the content. When in kenya,, there's limitations on Japanese communication skills
 204. I will love to study Japanese and intract with Japanese culture hope I will be considered if any opportunity comes across
 205. I believe that Japanese should be introduced as one of the foreign languages taught in schools...this will foster more interactions and opportunities for our people and Japan in future
 206. For now none
 207. Have desire to learn Japanese but I need more advice on this due to some situation right know
 208. This was a good insght
 209. Learning Japanese is fun and interesting. Finding time was an issue for me due to school and work but I want to continue learning soon. I would suggest that those marketing Japanese as a language to go to High Schools and Universities and help students create a Japanese club. You should also highlight the advantages of learning Japanese and what someone stands to gain. This will help push the Japanese language and culture to Kenyans since most words are similar.
 210. Availability of resources both reading and physically would help learners in learning and understanding Japanese Language.
 211. The right motivation will keep you learning Japanese because it's not very easy and when you think you've got the hang of it , you hear native Japanese people conversing and you realise their speed and other terminologies they use in the day to day interactions leaves you feeling like you know nothing 😊. Consistency goes a long way. It is fun for me to study Japanese.
 212. I wish to understand how can students with visual disability in Kenya learn Japanese
 213. For my institution, I think it would be good for the sensei's to host small followup class s with students that lag behind because of various factor and not judge the level of all students based students that take the course as a unit as they have more time dedicated to the Japanese course this they are always ahead of majority of other students who take it as an additional unit to their required school units.
 214. if they gave us the chance to learn Japanese with financial aid some of us would take it blindly because we just love the Asian culture and we want to know it and maybe embrace it.
 215. To provide free or affordable sessions for various schools to enable interested individuals to learn Japanese language.
 216. Where can I learn Japanese from?

217. Grateful for the Japanese Embassy Kenya for introducing me to the beautiful language! Congratulations on your achievements Njeri!
218. Learning without practicing the language makes it so easy to forget. If there is a community that fosters Japanese will be nice for me to join. I believe I will improve my Japanese and eventually be good at it.
219. Thank you for allowing me to be part of the Survey. I hope i have been of help.
220. No comments
221. learning Japanese has been very nice and it has been a good experience. I would like to tell Japanese stake holders to introduce it even to the lower grade classes so that students can start learning Japanese early.
222. I love Japanese language too much. Thank you.
223. I like Japanese language and I am interested to learn and understand it until I speak it fluent and also I have a dream of visiting Japan to Interact more with Japanese people.
224. I would like to be taught more and may be live in Japan in future because I just love Japan and their culture
225. I would like to appreciate the Japanese teachers for offering this wonderful opportunity for Kenyans to learn Japanese language.. thanks a lot and we are very much ready to learn ,e especially me! Thankyou
226. "The goal to be achieved in a language I feel should be communicating ideas, as that is why language evolved in the first place. To that end, there should be more activities incorporated in learning that require learners to use what they know to communicate something to someone else, see their expressions, gestures and other non-verbal cues. Textbooks and other tools are helpful but practice is paramount."
227. "The Japanese language is very interesting and enjoyable.Learning the 3 character of Japanese language needs a lot of attention but its interesting .Am looking forward to learn more and be fluent while speaking Japanese . Thank you."
